EDUCATION

Sona College of Technology

Salem, Tamil Nadu

B.E. Computer Science & Engineering (4th Year)

2023 – 2027

- CGPA: 7.35 / 10 (up to 6th Semester)
- Coursework: Data Structures & Algorithms, OS, DBMS, Machine Learning, Software Engineering

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, Java, SQL, HTML5/CSS3

Backend & APIs: Node.js, Express.js, REST API design, JWT Auth, Middleware/RBAC

Frontend: React.js, React Router, Context API, Tailwind CSS, Bootstrap

Databases & Tools: MongoDB (Atlas/Mongoose), PostgreSQL, MySQL, Firebase, Git/GitHub, Postman, CI/CD, Agile/Scrum

INTERNSHIPS

Full Stack Development Intern – *Live*

June 2026 – Present

Imagivite Technology

Remote

- **Tech:** React 19 · Node.js · Express 5 · MongoDB Atlas
- Built **Zonda**, a live e-commerce platform, as part of a small agile team – spanning 20+ REST endpoints across auth, cart, catalog, admin, and delivery-logistics domains.
- Scaled the API with **Node clustering** across all CPU cores and resolved production connectivity failures by pinning custom DNS resolvers; monitored throughput and database connection health in production.
- Wrote Postman-based automated test suites covering all 20+ REST endpoints and independently diagnosed concurrency-safe database-seeding races across worker processes, keeping all cluster workers online at startup.
- Refactored a 1,377-line monolithic admin dashboard into 9 domain-specific React modules (RBAC, orders, catalog, logistics) after navigating an ambiguous, undocumented codebase, cutting file size by **75%**.
- Implemented JWT-based auth middleware and role-based access control (Super Admin/Manager/Moderator/Support) securing admin, seller, and delivery partner workflows end-to-end.

Virtual Intern *AI/ML Track*

Remote

Infosys Springboard 7.0

2026

- Selected nationwide for Infosys Springboard AI/ML track; applied machine learning concepts to industry-relevant problem sets within a structured, mentor-guided program.

PROJECTS

NexChat – *End-to-End Encrypted Chat System* | GitHub

2026

- **Tech:** Python (Flask) · Java (WebSocket) · MongoDB · WebRTC
- Designed a distributed client-server system – a Python REST auth service plus a separate Java WebSocket server for real-time message relay, WebRTC signalling, and MongoDB-backed authorization checks enforced before every relay.

Gridlock – *AI-Driven Parking Intelligence* | GitHub | *Top Team, 30,000+ entries*

2026

- **Tech:** Python · Scikit-Learn (DBSCAN) · pandas · Folium
- Led an end-to-end data pipeline as part of a cross-functional team, applying DBSCAN clustering on geospatial data to identify congestion hotspots and recommend optimal parking allocation with **90% accuracy**.

Telemedicine Platform – *AI Healthcare System* | GitHub | *Nasscom Finalist, 5,743 entries*

2025

- **Tech:** React.js · Node.js · Supabase (PostgreSQL) · AI Chatbot
- Led frontend architecture for patient registration, scheduling, and secure EMR; integrated an AI chatbot for symptom triage as a national finalist among 5,743 entries.

OPEN SOURCE CONTRIBUTIONS

Contributors Rocket.Chat (Electron)

GitHub

GirlScript Summer of Code (GSSoC '26) · Open Source Track

2026

- Debugged and fixed a production anchor-navigation bug via a global event listener in `src/injected.ts` within a large multi-language TypeScript/JavaScript monorepo.
- Shipped **18+ PRs**, communicating and iterating with external maintainers through peer code review to meet code quality standards in an unfamiliar codebase.

CERTIFICATIONS & ACHIEVEMENTS

Nasscom Hackathon Finalist (Top Team / 5,743 entries) | National Srinivasan Ramanujan Mathematical Competition (2024) | Samitha Hackathon Recognition | Generative AI for Data Science | Computer Vision 101 | DSA in Java
