MERN Stack Development Intern ·

Remote

Maincrafts Technology

Jun 2026

- 2-week intensive internship; built and shipped React/Node.js projects in a professional setting.

Virtual Intern Springboard 7.0

Remote

Infosys Springboard

2026

- Selected nationwide for the Infosys Springboard Virtual Internship 7.0 (AI/ML track).

PROJECTS

Holiday Hideout – Full-Stack Booking Platform | 🎧

2026

- **Tech:** React.js · Node.js · MongoDB · REST APIs · Cloudinary · AI Chatbot · Role-Based Auth · MVC
- Wired REST API responses to React UI state with loading skeletons and error handling; achieved **65%** frontend performance gain via Cloudinary CDN and MongoDB indexing — **1.5s** avg page load.
- Ensured **mobile-responsive** layouts across all breakpoints; implemented role-based auth and integrated an AI chatbot — full SDLC ownership from design through deployment.

Telemedicine Platform – AI Healthcare System | 🎧 | Nasscom Finalist — Top team, 5,743 entries

2025

- **Tech:** React.js · Node.js · Supabase (PostgreSQL) · Health Metrics APIs
- Led frontend architecture and Supabase schema design; built UI for patient registration, appointment scheduling, secure EMR, and AI-assisted prescriptions — multiple health APIs unified into a single data layer.
- Primary technical liaison across full SDLC; flagged and resolved mobile layout issues before the live Nasscom demo among 5,743 teams.

Griklock-flipkart Hackathon – Traffic Demand Prediction | 🎧

2026

- **Tech:** Python · LightGBM · XGBoost · CatBoost · scikit-learn · pandas
- Built a traffic demand forecasting model that predicts ride/delivery volume at specific locations and times; achieved high accuracy using a triple ensemble of LightGBM, XGBoost, and CatBoost with 5-fold cross-validation.

Nabula – E-Commerce Platform | 🎧

2026

- **Tech:** · Java · PostgreSQL · CI/CD · Maven · React
- Ultra-premium full-stack e-commerce platform for laptops · electronics. Built with a dark indigo/cyan design system featuring glassmorphism cards, JWT auth (access + refresh tokens), admin dashboard, and full cart → checkout flow

OPEN SOURCE CONTRIBUTIONS

Contributor Rocket.Chat (Electron)

🎧 GitHub

- Fixed a production bug in anchor navigation via a global event listener in `src/injected.ts`; maintained **TypeScript/JavaScript** code quality across **18+ PRs** with peer reviews in a large monorepo.

Contributor GirlScript Summer of Code (GSSoC '26)

2026

GirlScript Foundation · Open Source Track

- Selected nationwide; contributing across Contributor/Mentee and Open Source tracks.
